

Introduction to SEA DL Course for China

***Laura Tlaiye, Manager
ESSD Division
World Bank Institute***

Course Objectives

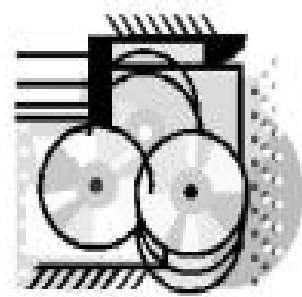

- Raise decision makers' awareness about SEA and its importance
- Enhance the knowledge and skills of practitioners for SEA preparation
- Introduce latest international and domestic SEA experiences and good practices

Course Contents

- **Part I:** SEA overview and international experiences
 - Module 1: Basics of SEA
 - Module 2: How to Conduct SEA
 - Module 3: International Experience and Case Studies
- **Part II:** SEA application in China
 - Module 4: Context and Development of SEA in China
 - Module 5: China's EIA Law
 - Module 6: Case Studies in China

The modular course can be easily tailored based on local needs.

Course Materials

Videos

- About 30 hours pre-taped presentations given by over 30 international and local experts
- Dubbed into Chinese

Textbook

A textbook in local language is published, which includes:

- Presentation scripts
- Presentation slides
- Reading materials

Delivery Mode

The modular course could be delivered in a combined format as:

- Two-way interactive video conferences
- Face-to-face lectures
- Video playing
- In-class group discussions
- Reading materials after class
- Quizzes
