

Country Data Report for EGYPT, 1996-2010

This Data Report provides a summary of the six aggregate governance indicators, together with all of the publicly-available disaggregated data on which the aggregate indicators are based. The underlying data as well as methodological issues are described more fully in "The Worldwide Governance Indicators: Methodology, and Analytical Issues" (September 2010).

The Report displays the country's performance for all available years between 1996 and 2010 in six governance dimensions: i) Voice & Accountability, ii) Political Stability and Lack of Violence/Terrorism, iii) Government Effectiveness, iv) Regulatory Quality, v) Rule of Law, and vi) Control of Corruption. Each page shows the country's percentile rank on one of the six governance indicators. Percentile ranks indicate the percentage of countries worldwide that rate below the selected country. Higher values thus indicate better governance ratings. The graph also reports the margins of error displayed in the line charts by dashed lines, and corresponding to a 90% confidence interval. This means that there is a 90 percent probability that governance is within the indicated range.

Underneath the line charts, the Report also displays data from all the underlying sources used for that indicator. Individual ratings have been rescaled to run from 0 (low) to 1 (high). These scores are comparable over time and across countries since most individual measures are based on similar methodologies over time. Scores from different individual indicators are not however directly comparable with each other since the different data sources use different units and cover different sets of countries. The data from the individual indicators are in fact further rescaled to make them comparable across data sources before constructing the aggregate governance indicators. Note that for some variables we present an "NP", where "NP" stands for "Not Public", because the data is confidential and cannot be publicly disclosed at the request of the organizations producing the data. To find out more about each source/organization click on the provided links. More information about each of the underlying organization/source can also be found in the website.
